

Close the delivery gap in two stages

Decision brief for the operating committee

Strategy Office · September 2026

1. Recommendation

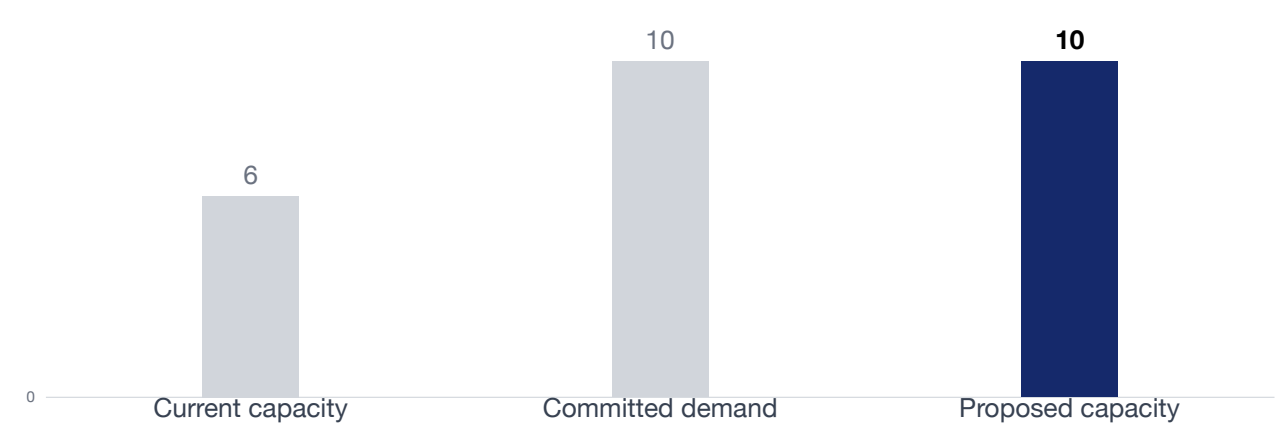

Approve four additional monthly delivery slots in two stages. Confirm staffing for the first two, then review quality and unit economics before releasing the next two.

2. Evidence and assumptions

The illustrative plan has ten committed projects and six available slots in the same month. The four-project gap is a capacity shortfall, not a revenue forecast. The model assumes comparable effort per project. If complexity differs, use effort-weighted capacity; if staffing is delayed, revisit customer start dates.

Exhibit 1 — Capacity expansion should follow two operating gates

Monthly projects · Illustrative planning case · September 2026

Capacity and commitments use the same monthly period; no conversion from revenue is assumed.

Source: illustrative operating model; replace with approved planning data.

Stage the capacity increase

Start with two additional delivery slots. Release the next two after quality and cycle-time checks.

3. Decision and accountability

GATE	OWNER	EVIDENCE REQUIRED
Add two slots	Operations lead	Confirm staffed capacity and project mix
Release the next two	Operating committee	Review cycle time, quality, and unit economics
Revisit demand	Commercial lead	Reconcile signed commitments and start dates
