

Growth needs capacity.

FY26 growth review · Q4 board decision

Strategy team · September 2026

ILLUSTRATIVE EXAMPLE

Three questions for the Q4 decision

01 Growth

What drove the \$5M ARR increase?

02 Adoption

Where does rollout need more support?

03 Capacity

What must we fund before we scale?

SECTION 01

Growth, then capacity.

The evidence behind the Q4 decision

01 Growth

02 Adoption

03 Capacity

Build capacity for the next growth phase

FY26 operating review · Three signals for the board

+50%

ARR growth

\$10M to \$15M. New enterprise customers contributed \$3M.

Protect the enterprise growth engine.

6 / 6

Segments growing

Adoption rose across all six segments. Healthcare reached 28%.

Investigate the rollout gap.

60%

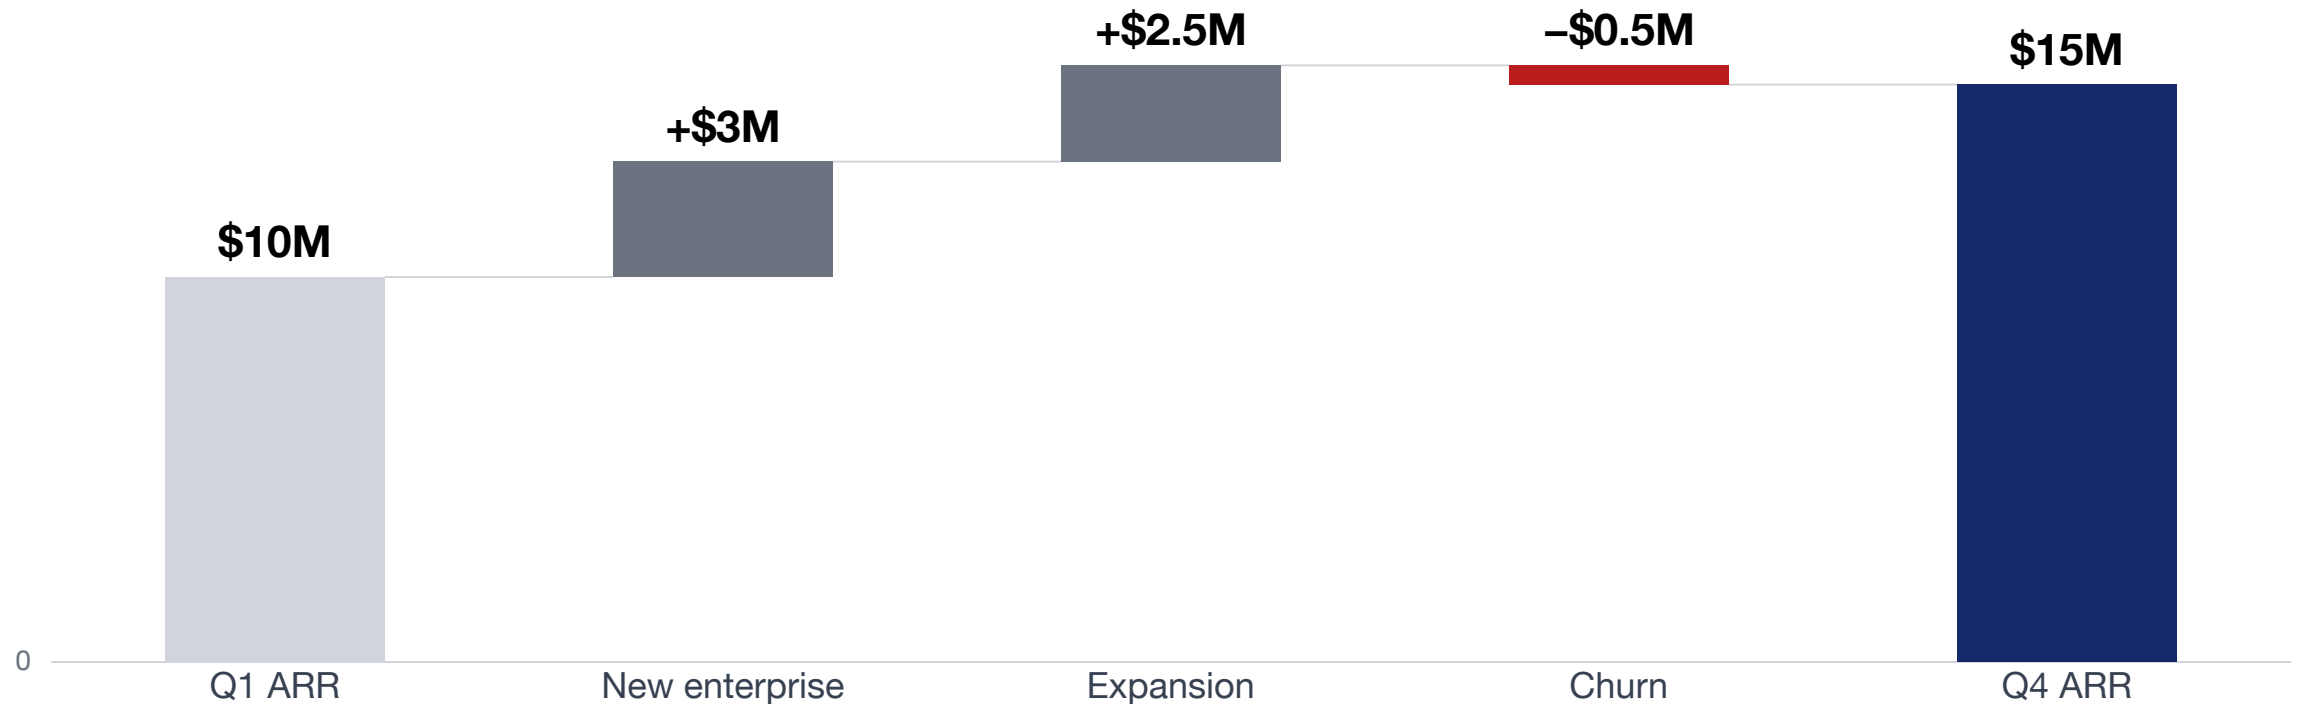

Capacity coverage

Onboarding capacity covers 60% of signed commitments.

Close the delivery gap before scaling.

Enterprise growth lifts ARR from \$10M to \$15M

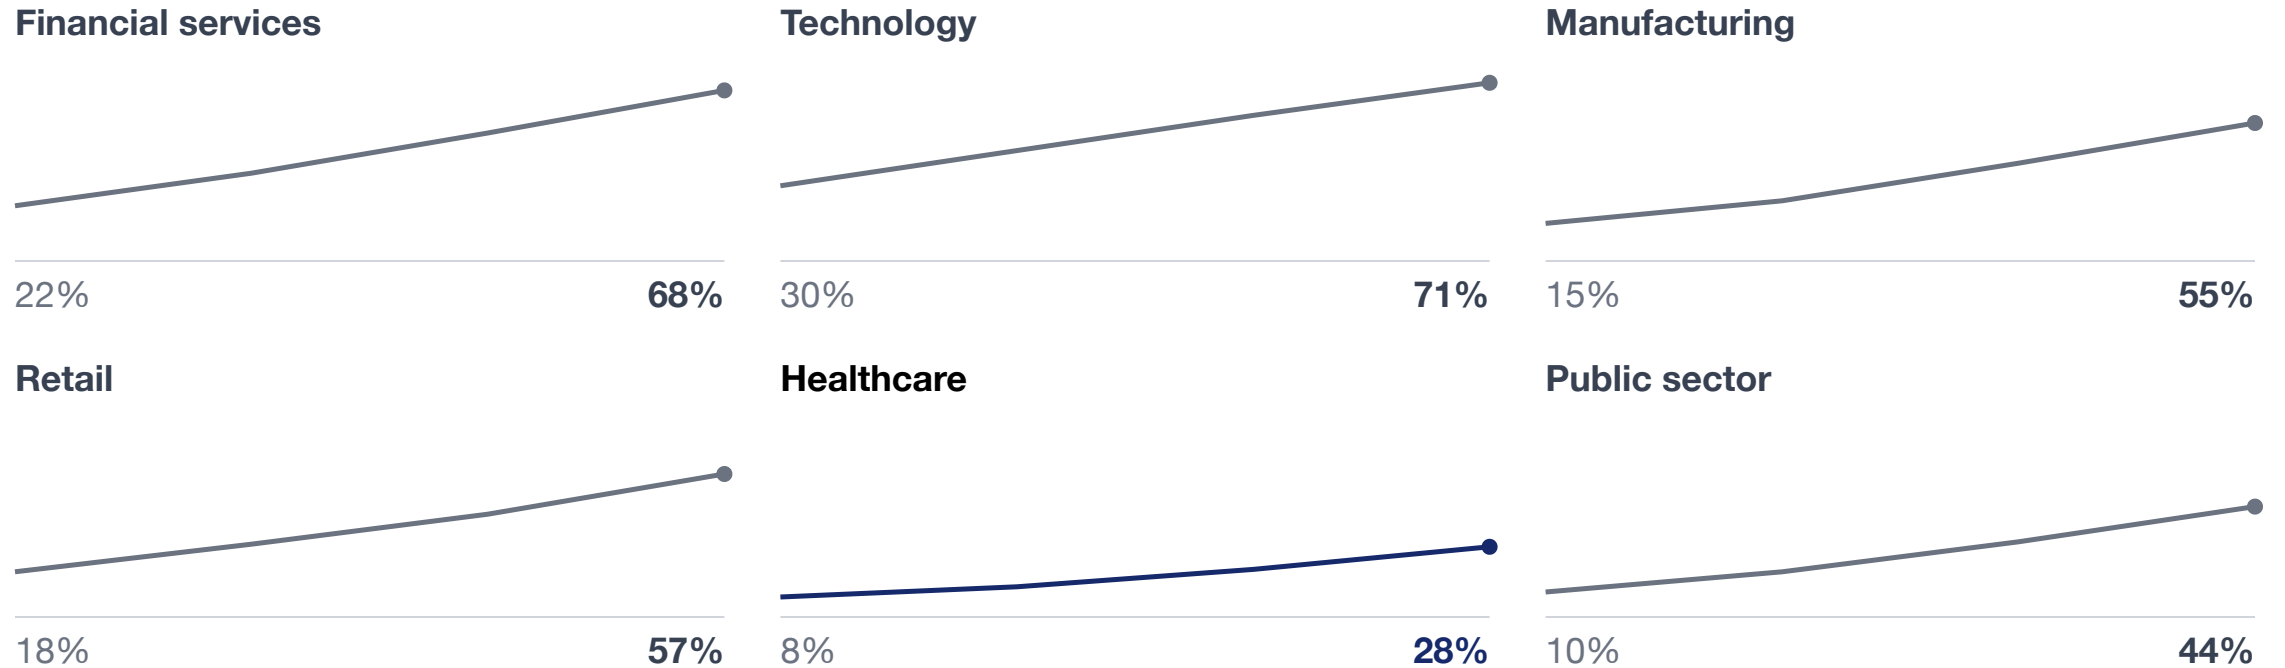

FY26 ARR bridge · \$ millions

+\$5M net ARR growth · New enterprise accounts contribute 60% of the net gain.

Adoption grows across every segment

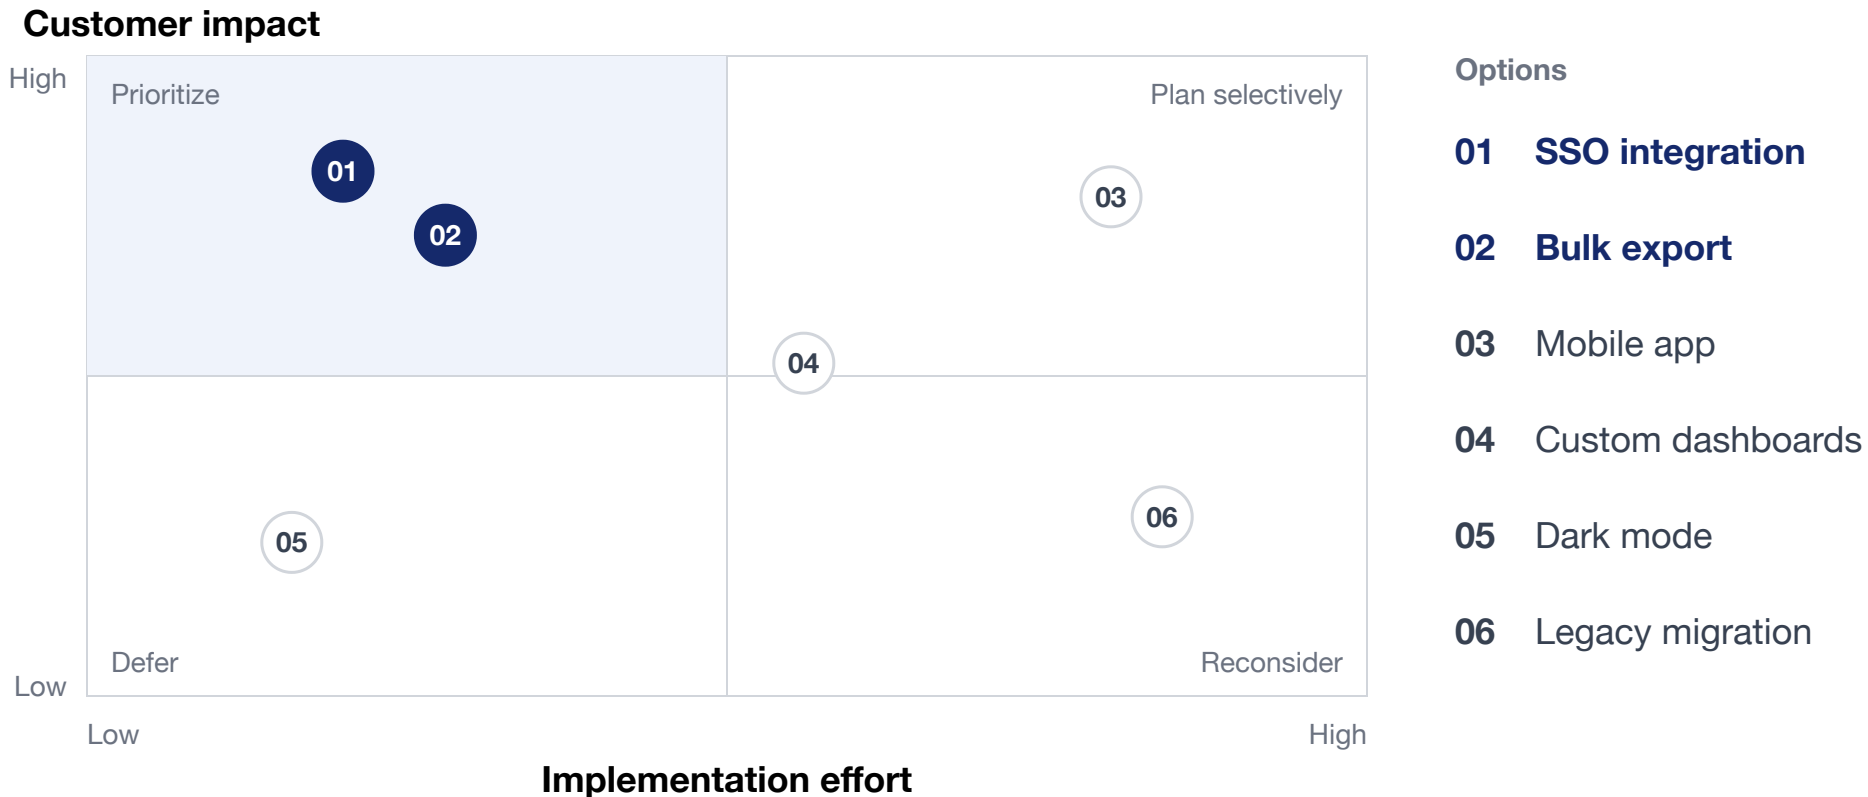

Workflow adoption · Q1–Q4 · % of accounts, shared scale

Healthcare reaches 28%; investigate the adoption gap before expanding rollout.

Prioritize SSO and bulk export for enterprise

Illustrative feature assessment · Relative effort and customer impact

Validate delivery estimates before allocating engineering capacity.

Close the capacity gap before raising growth targets

KEY TAKEAWAYS

- 1** ARR grew 50%, led by enterprise acquisition
- 2** Adoption increased in all six segments
- 3** Capacity covers 60% of signed commitments

NEXT STEPS

Cost the capacity gap

Operations · Within 2 weeks

Prioritize SSO and bulk export

Product · Q4 planning

Review funding and delivery milestones

Board · Next meeting
