ILLUSTRATIVE

Project Relay

A 12-week dispatch pilot. North first. East conditional.

Operations steering committee

Illustrative exercise

Approve a $0.6m cap; start with North

$0.6m

Approve the cap

Total cap, including conditional East

North starts in Week 1

W6

Decide on East

Adoption ≥55% and readiness ≥70

Activate only under technician constraint

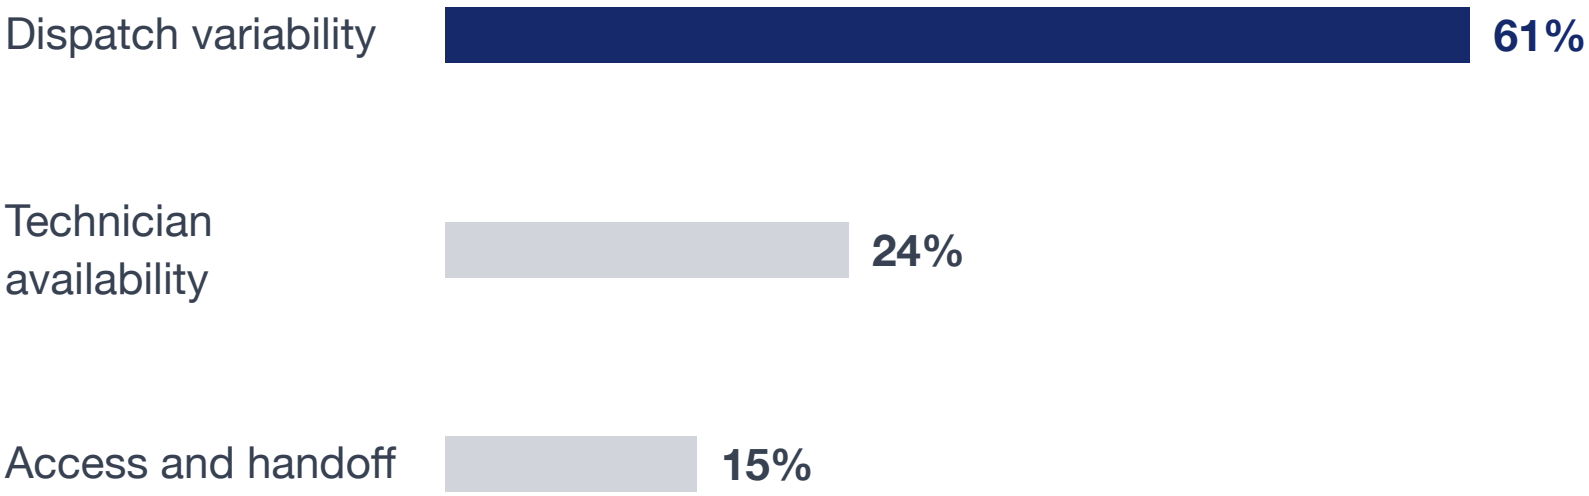

W12

Review the results

Return to the steering committee

Network scale needs a separate decision

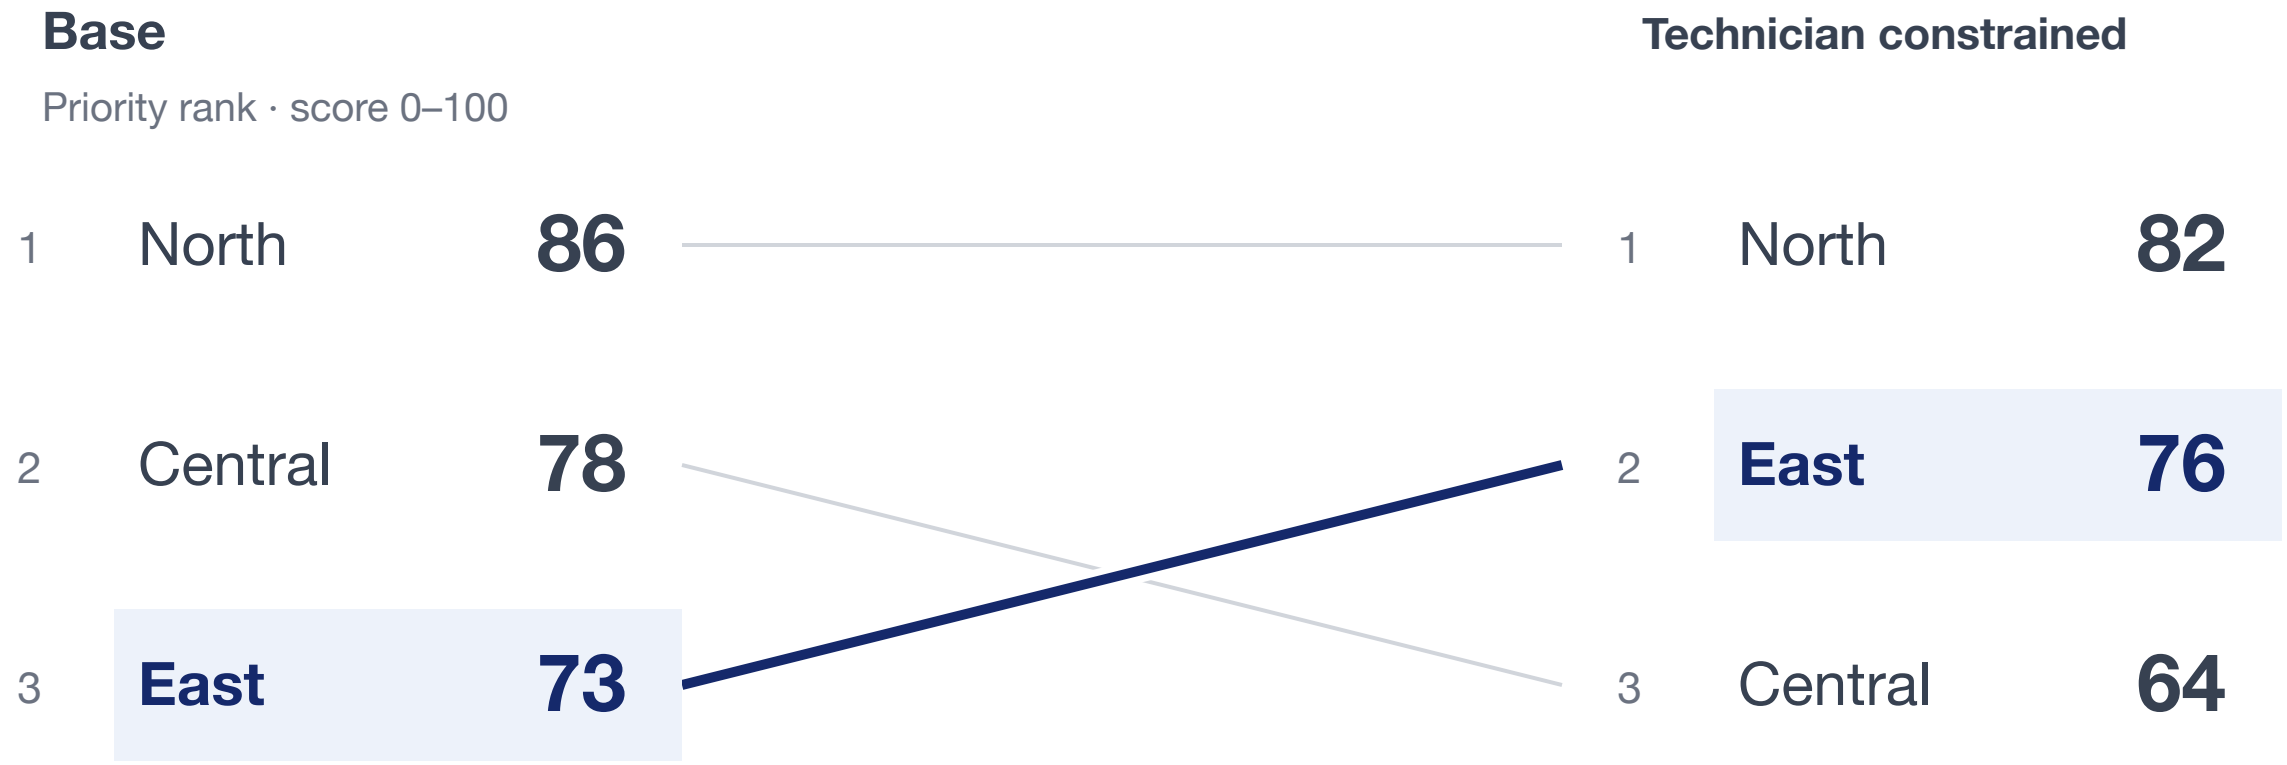

Dispatch causes 61% of delays; fix it first

Assignment timing is the pilot's first intervention

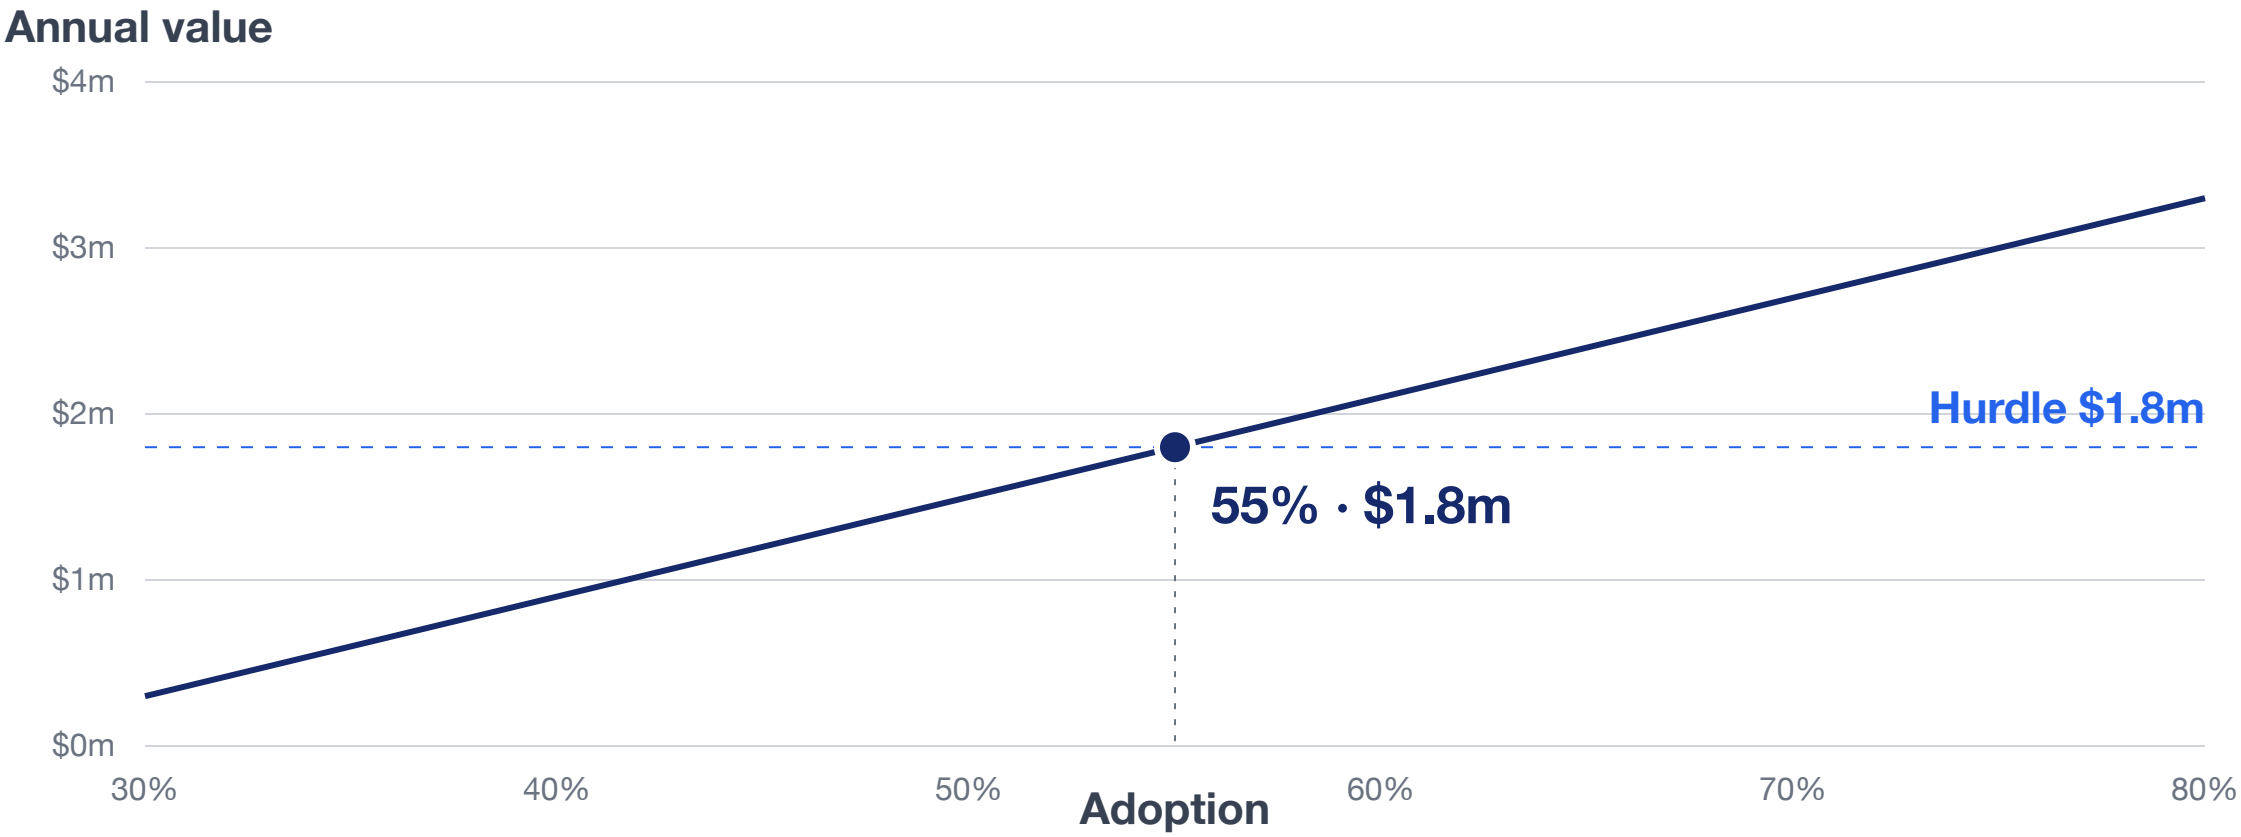

Illustrative synthetic review; 1,200 jobs over 12 weeks

North leads; staffing sets the second route

East: #3 → #2 · +3 priority pts

55% adoption clears the $1.8m hurdle

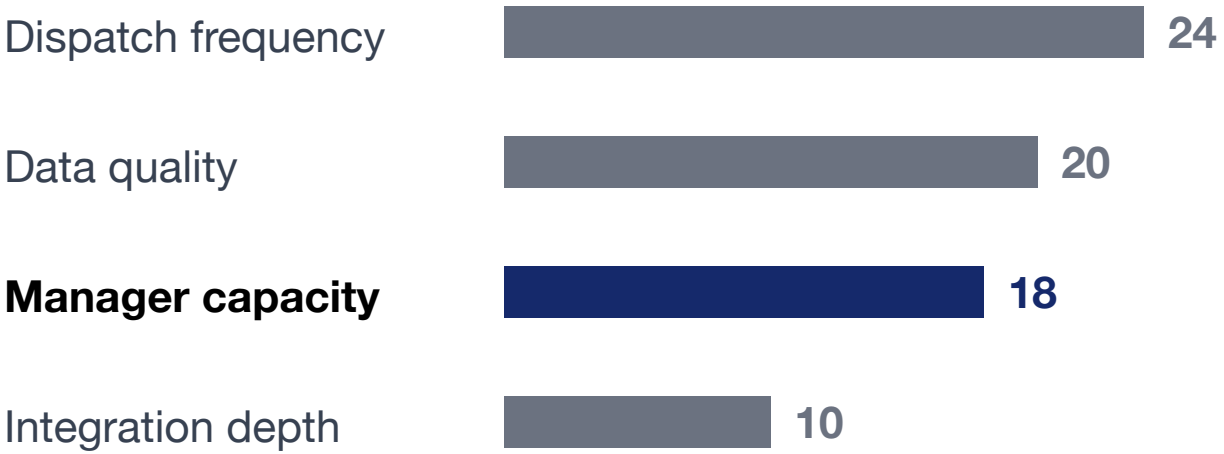

Proceed · The adoption gate is clear

Illustrative adoption and annual-value assumptions

Manager capacity keeps readiness above 70

Readiness contributions

Proceed; threshold ≥ 70 points

Pilot-ready

72 points

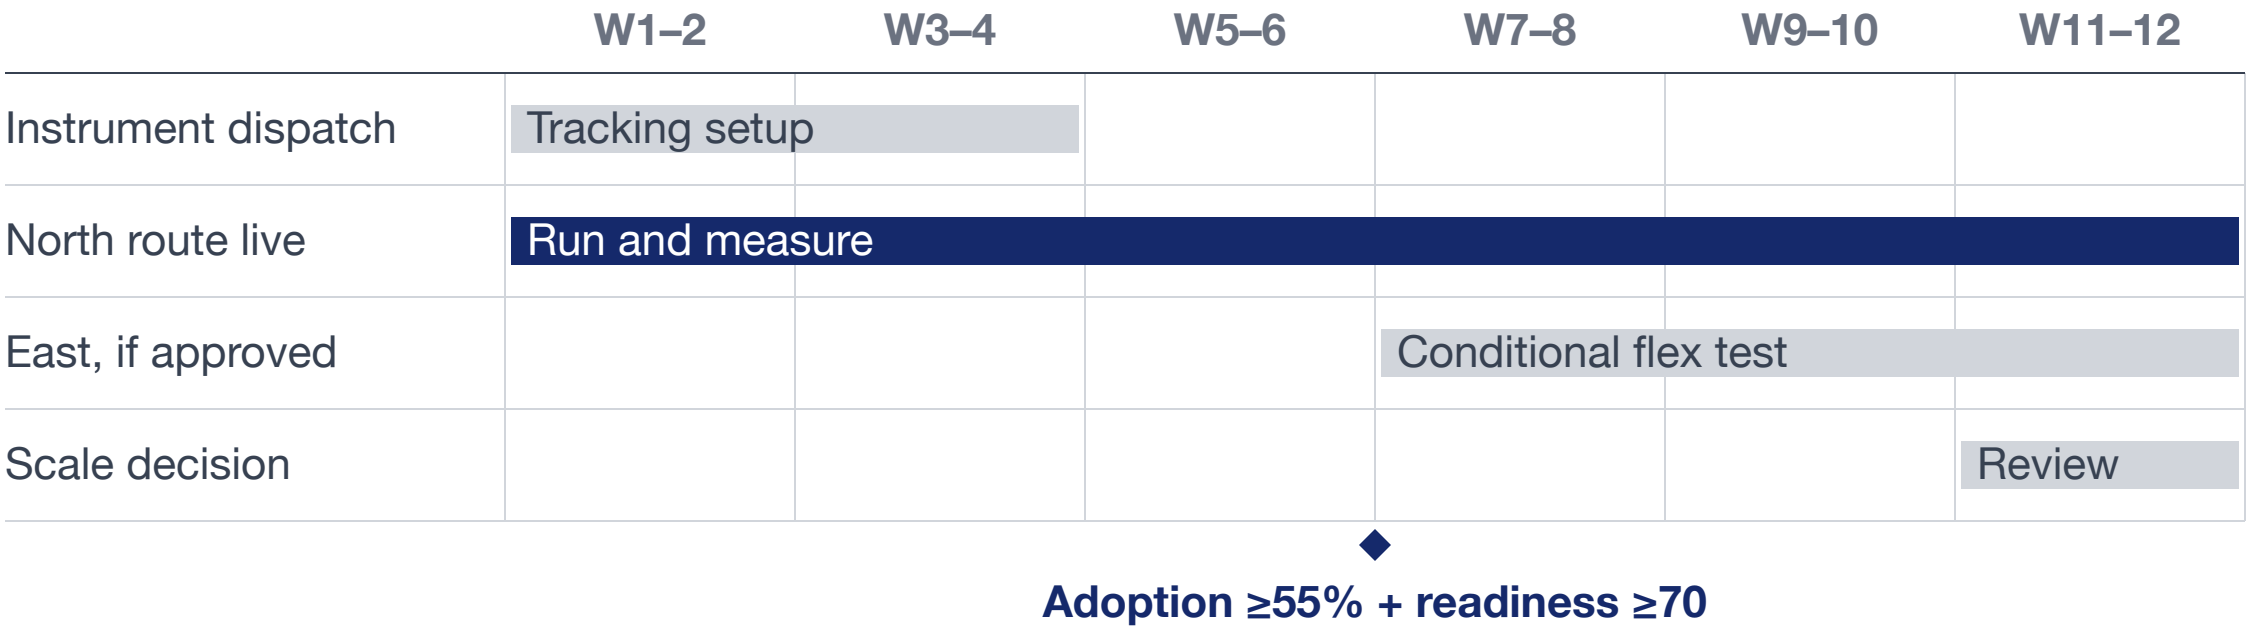

The readiness gate is clear

Without manager capacity

54 points

70 gate

The Week 6 review decides whether East starts

East also requires the technician-constraint case; network scale is a separate decision

Approve the cap; gate East at Week 6

Week 1

Launch North

Confirm manager capacity and launch North

Operations lead

Week 6

Decide on East

Check 55% adoption, readiness ≥70 and the staffing case

Pilot owner

Week 12

Review network scale

Review results before any network expansion

Steering committee

Decision today: approve the $0.6m total pilot cap and assign the owner
